

Functional & Performance Testing Template

Model Performance Test

Date	01 October 2026
Team ID	SWTID-2026-6491
Project Name	Import Data using Transform Maps (Spreadsheet)
Maximum Marks	

Test Scenarios & Results

Test Case ID	Scenario (What to test)	Test Steps (How to test)	Expected Result	Actual Result	Pass/Fail
FT-01	Text field import (Student Name, Department, Email)	Load the spreadsheet and run the Transform Map; open the target table	Text values are stored correctly in String fields	All 5 names, departments and emails are stored correctly	Pass
FT-02	Number field import (Student ID, Year)	Check the Student ID and Year columns after the transform	Numeric values are stored in Integer fields	Student ID (101–105) and Year are stored as integers	Pass
FT-03	Data import (record creation)	Run the Transform Map "Student Information" on the import set	Records are created from the spreadsheet rows	5 records inserted in the target table	Pass
FT-04	Transform Map / table connection check	Open Transform History and check the map and import set table	Map finds the import set table and completes	State Complete; map "Student Information" with u_student_import	Pass
PT-01	Response time test	Note the run time in Transform History	Should be under 3 seconds	Run time: 1 second	Pass

PT-02	Multiple record processing	Check Inserts / Ignored / Skipped counts after the run	All rows processed without being ignored or skipped	Total 5, Inserts 5, Ignored 0, Skipped 0	Pass
PT-03	File upload test (spreadsheet)	Upload the spreadsheet and process it	Works smoothly without errors or crashing	Upload and transform completed, Errors 0	Pass
