1	Student ID	Student Name	Department	Email	Year																																							
2	101	Thivin	AIDS	thivin@gr	3																																							
3	102	Arun	CSE	arun@gm	2																																							
4	103	Priya	ECE	priya@gm	3																																							
5	104	Kumar	IT	kumar@gi	2																																							
6	105	Ravi	CSE	ravi@gma	3																																							
2.	Data Preprocessing	Custom table Student Information created with typed columns (Integer / String) and the Transform Map maps each source field to its target field. Transform result: 5 inserts, 0 errors. 																																										
3.	Utilization of Data Filters	Report condition "All" (no records excluded); report is grouped by Email. 																																										
4.	DAX Queries Used	No custom formula needed. Aggregation used: Count of records grouped by Email.																																										
5.	Dashboard design	No of Visualizations / Graphs - 2 (single score showing 5 and a line chart of records by date).
