

Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	01 October 2026
Team ID	SWTID-2026-6491
Project Name	Import Data using Transform Maps (Spreadsheet)
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	Data Source Preparation	Prepare spreadsheet with Student ID, Student Name, Department, Email, Year Upload the .xlsx file as an attachment to the Data Source
FR-2	Table Creation	Create custom table "Student Information" [u_student_information] Define columns and data types (Integer / String)
FR-3	Data Import & Transform Map	Load data into import set table u_student_import Create Transform Map "Student Information" with field mapping Run transform and verify inserts / errors
FR-4	Reporting	Create pie chart report grouped by Email with Count aggregation View report of imported records
FR-5	Dashboard	Create "Student Information Dashboard" Add single-score and line-chart widgets
FR-6	Access Control	Only authorised (admin) users can create tables, import data and edit maps Application access settings on the table

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	Usability	Simple ServiceNow UI; import done with a guided Load Data and Transform Map form, no coding required.
NFR-2	Security	Role-based access control (ACLs and Application Access)

		protects the table and the import process.
NFR-3	Reliability	Transform History records inserts, updates, ignored, skipped and errors so every import can be verified (5 inserts, 0 errors).
NFR-4	Performance	Import of 5 records completes in about 1 second.
NFR-5	Availability	Hosted on the ServiceNow cloud instance; available whenever the instance is up.
NFR-6	Scalability	The same Transform Map can import larger spreadsheets and be reused for new files with the same layout.
